☒    A Completed Form PTO-1449 (Modified) is attached hereto.

### **Section 3. Statement as to Information Not Found in Patents or Publications (Information Not Listed in Form PTO-1449(Modified))**

The present invention relates generally to information collection systems, and more particularly, but not by way of limitation, to an improved process for collecting demographic information from bills paid to a third party by customers in a cash transaction at a point of sale.

The collection of information from customer transactions is not a new undertaking. Companies historically have collected customer and demographic information from customer credit card transactions so as to develop a pattern of customer buying habits.

However, many customers do not have credit cards, thus there is a large percentage of paying customers for which demographic information is not available. Though many customers may desire electronic transactions, other customers desire, or are required to transact business in cash. This makes it more difficult to obtain demographic information from cash paying customers.

Thus, a need exists for a method and apparatus that enables companies to acquire demographic information from customers that pay for products in cash.
